

Open Gate Poodles

Buyer Information:

Name: _____

Address: _____ City: _____ ZIP: _____

Phone number: (_____) _____ - _____

Do you intend to neuter your Open Gate puppy? Yes No

If answered no, Open Gate removes any health guarantee that was given, due to the compromised security of the dog in pregnancy, or by the breeding process. The puppy must be neutered before reaching seven (7) months.

"I guarantee all registration papers on listed puppies. Prior to leaving with the Buyer, said puppy will have been de-wormed at 2, 4, 6, and 8 weeks, and would have had its initial puppy shots - at approximately 7 or 8 weeks. I do not guarantee the mature size of dog, or whether it would be breed or show quality: we sell all puppies as pets. Guarantee only stands if Buyer has completed the registration process with AKC.

I provide a one year health guarantee, provided Buyer has not mistreated or neglected (accidentally or on purpose), sold, or transferred the puppy, as well as can show proof of routine veterinary care, including a veterinary visit within a week of the date on this contract. This guarantee does not cover typical puppy ailments, including but not limited to: worms, vitamin deficiency, viral bacterial disease, or sickness brought on by parasites.

Buyer will pay all veterinary fees, and must provide certification that the puppy is ill due to another factor outside of the ones listed above. I must be notified within four days of the vet appointment in order for Buyer to be able to receive a replacement puppy once one becomes available. The sick puppy must be returned into the custody of Open Gate. Potentially, Buyer may not receive monetary compensation."
