"The dam will stay with the Open Gate family for the course of a week, starting on \_\_\_\_\_ and ending on \_\_\_\_\_ in order to breed with their dog, AKC Phoenix, a miniature poodle. The price ( \_\_\_\_\_ ) will be paid up front, and guarantees mating, but not pregnancy. If the dam does not get pregnant, Open Gate will provide return service at the time of the dam's next heat (at which time a pregnancy is likewise not guaranteed).

Impregnation, the amount of puppies, and the color of the puppies is in no way guaranteed by Open Gate. One puppy constitutes a litter. Open Gates stands behind the health of their dog, but not all offspring, and promises to sign all registration paperwork in a timely manner and provide any pedigrees or proofs of registration if they are requested by the dam owner.

The dam's owner is responsible in ensuring the dam is ready to mate when they bring her to the Open Gate family.

The dam's owner promises to ensure the dam is in good health before breeding, and promise to keep the dog in confinement following the mating period to ensure she is not accidentally mated with by another dog. They promise to not knowingly sell to a person or business associated with the wholesale of dogs."
